Here a few
extra
activities for
you to try.

Activity 1

Mrs Riley has used the 10 frames to calculate $6 + 7$

I partitioned the 7 into 4 and 3 so that I could make a full 10.

$$\boxed{10} + \boxed{3} = \boxed{\quad}$$

Use Mrs Riley's Method to complete:

$$\boxed{\quad} + \boxed{3} = \boxed{\quad}$$

$$\boxed{\quad} + \boxed{\quad} = \boxed{\quad}$$

$$\boxed{\quad} + \boxed{\quad} = \boxed{\quad}$$

Answers

$$\begin{array}{c} 5 + 8 \\ \swarrow \quad \searrow \\ \textcircled{5} \quad \textcircled{3} \end{array}$$
$$\boxed{10} + \boxed{3} = \boxed{13}$$

$$\begin{array}{c} 3 + 8 \\ \swarrow \quad \searrow \\ \textcircled{7} \quad \textcircled{1} \end{array}$$
$$\boxed{10} + \boxed{1} = \boxed{11}$$

$$\begin{array}{c} 7 + 9 \\ \swarrow \quad \searrow \\ \textcircled{3} \quad \textcircled{6} \end{array}$$
$$\boxed{10} + \boxed{6} = \boxed{16}$$

Take it Further

Mrs Riley has now used a number line to calculate $6 + 8$

I partitioned 8 into 4 and 4 to make it easier.

Use Mrs Riley's method to calculate:

$5 + 8 = \square$ $9 + 4 = \square$ $6 + 8 = \square$

Can you see how I used the tens frame to help me partition.

Answers

A little more!

Mrs Riley has 7 sweets and Mrs Hounsell gives her 8 more.
How many sweets does she have altogether?

Show your calculation on the number line.

$$7 + 3 = 10$$
$$10 + 5 = 15$$

Answers!

Show your calculation on the number line.

$$7 + 3 = 10$$
$$10 + 5 = 15$$

Have a go

Write a number sentence to describe what has happened on the ten frames. Use the number line to find the answer.

$$\square + \square = \square$$

Answers

$$\boxed{6} + \boxed{7} = \boxed{13}$$

1. Solve the problem and show your workings as a calculation, on a number line and as a part whole model.

KS2 Add by making 10 **Fluency & Problem Solving** **2**

Solve the problem and show your calculation on a number line.

Jasmine has 9 sweets and Ralph gives her 8 more sweets.
How many sweets does she have altogether? _____

9 + _____ = 10
10 + _____ = _____

Jasmine has 7 sweets and Ralph gives her 5 more sweets.
How many sweets does she have altogether? _____

7 + _____ = 10
10 + _____ = _____

Jasmine has 6 sweets and Ralph gives her 7 more sweets.
How many sweets does she have altogether? _____

6 + _____ = 10
10 + _____ = _____

Solve the problem and show your calculation on a number line.

Jasmine has **9** sweets and Ralph gives her **8 more** sweets.

How many sweets does she have altogether? _____

9 + _____ = 10

10 + _____ = _____

Jasmine has **7** sweets and Ralph gives her **5 more** sweets.

How many sweets does she have altogether? _____

7 + _____ = 10

10 + _____ = _____

Jasmine has **6** sweets and Ralph gives her **7 more** sweets.

How many sweets does she have altogether? _____

6 + _____ = 10

10 + _____ = _____

Solve the problem and show your calculation on a number line.

Jasmine has **9** sweets and Ralph gives her **8 more** sweets.

How many sweets does she have altogether? 17

$$9 + \underline{1} = 10$$

$$10 + \underline{7} = \underline{17}$$

Jasmine has **7** sweets and Ralph gives her **5 more** sweets.

How many sweets does she have altogether? 12

$$7 + \underline{3} = 10$$

$$10 + \underline{2} = \underline{12}$$

Jasmine has **6** sweets and Ralph gives her **7 more** sweets.

How many sweets does she have altogether? 13

$$6 + \underline{4} = 10$$

$$10 + \underline{3} = \underline{13}$$

Well done Year 2. You are fantastic. I can't wait to see your work. Please send it to me using our new class e-mail:

year2@st-jost.dudley.sch.uk

These are blank tens frames in case you need them.
